

SolarSwitch™ Reliable power – Wherever. Whenever.

A safe and secure way to cover containers and trailers ensuring that they can be left overnight without the risk of waste being blown out or disturbed. This solar powered system comes with a 12 volt electric motor, a lockable bespoke box ensuring the maintenance free non-spillage battery remains safe. Enclosed is also the remote control, relay box and a secondary manual switch. The solar panel allows a trickle feed into the special high powered battery ensuring constant and reliable operation.

SolarSwitch™

- Quick automatic covering for free standing containers and trailers
- Remote control option available
- Robust low-profile solar panelling
- Reliable power unique to Transcover
